1857-r00.pdf

Update: I called and talked with Becki. She mostly wants us to be on stand-by for Reg 3 to assist with any questions that may come up and reach out to them making them aware of our assistance. By CC I'll share this with Steve and Glynda so they know about this request. There may be calls next week. Steve/Glynda - take a look at the MCHM method attached. I'm not sure how they plan on analyzing for propylene glycol phenyl ether (PPH), which is the second contaminant that's recently been identified.

Dan and Greg,

This message provides some further background to the voice mail message I just left for Dan.

I was on a call this afternoon with Chris Weis and Aubrey Miller of NIEHS and Greg Sayles of ORD. I understand that the state of West Virginia is seeking help from EPA to develop an analytical method for the set of glycol ethers in the product PPH, recently found to be released along with MCHM during the Elk River spill.

I believe R3 is involved (see the email trail below), but can you please reach out to your contacts there to get up to speed and offer our assistance? Greg Sayles can help with ORD assistance if needed.

Please call me if you have any questions (202) 564-3818 or Ex. 6 - Personal Privacy thanks for your help!

Becki Clark, Deputy Director
Office of Ground Water and Drinking Water Office of Water

Kelly,
Here is the SOP for 4-MCHM. This method was used for Region V for Art Smith -OSC (12 samples from Ohio river collected by USGS for ERT).
Thanks.
-Raj

All,

We have coordinated another conference call with all of you involved in the chemical detection of PPh and MCHM with the EPA Lab Manager and staff at Ft Detrick, MD

This is short notice but would benefit everyone to share information with EPA lab.

Conference Call: 3:30 pm today

Ex. 6 - Personal Privacy

Lt. Col. Grant,

I am the Lab Manager for the EPA R3 Laboratory. I was informed that you had some questions for us.

I can be reach at 410-305-2732 and am in the office today.

Thanks,
Cindy

Subject: Coordination of Water Sampling in WV

All,

Through Dr. Vik Kapil (Senior Medical Officer and Associate Director for Science at CDC/ATSDR) it is my understanding that the State of WV has now requested support from EPA on sampling and analysis for the Kanawha water system in West Virginia. HHS agencies have been providing science support to CDC/ATSDR (ESF 8) during the response including coordination with EPA. The list of individuals on this email are those who we (HHS) have been in communication with or were recommended by our contacts. I hope this facilitates discussion among those key individuals. Key contacts for the State of WV are:
